Attachment - Additional Questions for the Record

**The Honorable Gregg Harper**

1. The Commission recently updated its rules regarding staff participation in the voluntary standards process. During the update, the Commission acknowledged that a mixture of voluntary and mandatory standards “can increase product safety better than either mandatory or voluntary activities alone.” Do you agree with that statement and do you believe that view is held throughout the Commission?
2. How fundamental are the new changes for Commission staff participation in the voluntary standards process for your industry?
